Zaber™ High Precision Motorized Stage Systems [See More by Zaber™](#)

- High Accuracy, 25mm, 50mm, 100mm, and 200mm Travel Options
- Integrated Motor and Controller
- Available with Integrated, 200 Counts per Revolution (CPR) Motor Mounted Encoder
- Easily Configurable in X-Y or X-Y-Z Configurations
- Vacuum-Compatible Options

Common Specifications

General

Manufacturer:	Zaber Technologies Inc.	Type of Motor:	2-Phase Stepper
----------------------	-------------------------	-----------------------	-----------------

Physical & Mechanical Properties

Type of Movement:	Linear (X)	Guide System:	Needle Roller Bearing
Backlash (μm):	<12	Load Capacity (kg):	10
Repeatability (μm):	<3		

Electrical

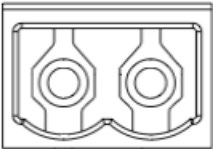

Maximum Operating Current (mA):	350
--	-----

Technical Information

Device Overview / Connectors

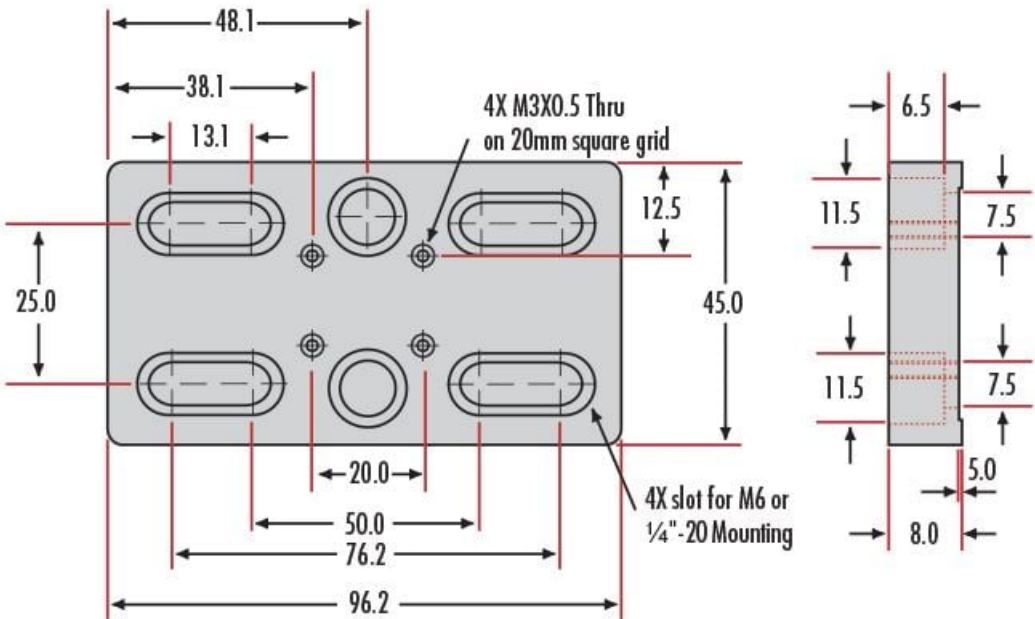

Images are shown looking into the device.

Power

	Pin	Description
	1	24 - 48 V
	2	GND (Note: power supplies ground this pin to AC Earth)

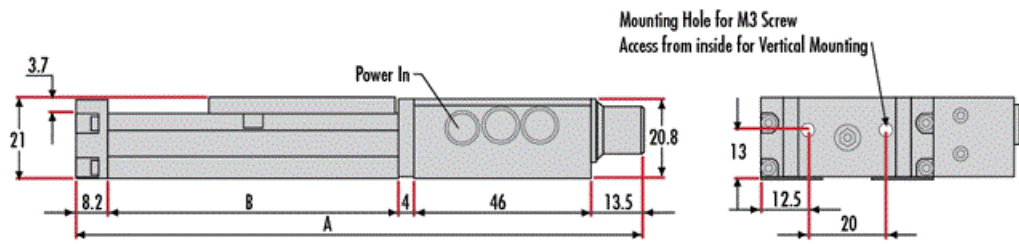

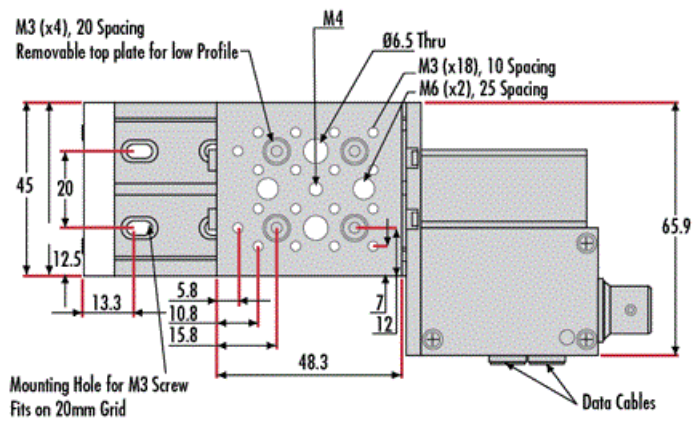

Note: To prevent damage to the device due to static buildup, the device should be properly grounded. The power supplies for X-Series devices are non-isolated and thus ground the device chassis to Earth via the negative terminal of the power supply. If for any reason you are using an isolated power supply, please ensure your device is grounded by connecting the negative terminal of the power connector to AC Earth.

#68-645

Technical drawing of a square grid plate. The plate is 60.0 units wide and 60.0 units high. It features a 3x3 grid of circular holes. The center hole has a crosshair. The outer holes have a dot in the center. Dimensions are indicated: 5.0 units from the left edge to the first hole, 25.0 units between holes, and 5.0 units from the last hole to the right edge. A label '4X Counterbore for M3 Mounting Screw' points to the top-left hole. A label '9X M6 Thru at 25mm Square Grid Spacing' points to the grid. A side view on the right shows the plate's thickness as 6.0 units.
